

This chair will make you happy

It will make your back
(and your wallet) feel great.

PART CHAIR. ALL HUMAN.

POP.T.01

How can we make the perfect office chair?

Why is it that comfortable office chairs are so ugly, and beautiful office chairs so uncomfortable (and expensive?) Come on, its the 21st Century. So we set out to do better. To make a beautiful looking task-orientated chair that provides total support through a long day at the office. At a fair and affordable price.

Fit any office

Great office chairs are designed around the needs of people at work. We sit still for long periods of time, but we also swivel, turn and stretch. We lean back and forward, reach up and bend down. Clearly we need to be able to adjust every aspect of our chair to create an ergonomic operating position.

GUARANTEED TO LAST
Bifma certified.

STRONG AND FLEXIBLE 3D MESH

3D ARMS WITH WIDTH ADJUSTMENT

Height adjustable, angle adjustable, width adjustable and reach adjustable. Option with or without arms.

OPTIONAL LUMBER SUPPORT

SLIDING SEAT

WIDE RANGE OF COLOURS

FULL SYNCRO MECHANISMS

POP's 5 lock synchronous mechanism (synchro tilt) maintains your ideal back/seat angle when you change the tilt of your chair. The back moves more than the seat so you continue to sit comfortably.

ALUMINIUM OR POLYPROPYLENE BASE

UNIVERSAL CASTORS

Happiness by design

The happier you are the more beautiful you become

It's time to lighten up a bit. No, check that, to lighten up a lot. Banish ugly and uncomfortable office chairs to the scrapheap of history. To replace them with beauty, comfort, brightness and joy. So we invented ChairClub: German design meets South African engineering and production. Boom! Beautiful chairs and big smiles.

German quality and style

First we asked award-winning German designer Stefan Brodbeck to create office chairs that would throw out the office-chair rulebook. Youthful, happy and no-compromises comfortable. He got it.

Proudly made in South Africa

Then we asked our team in South Africa – product development, manufacturing, marketing, logistics, quality control and many others – to build our chairs to the highest global standards. They do.
